## Cut-and-Fold Globe

Adapted from 12 inch Globe (Chicago : Denoyer-Geppert, ca. 1923)

1. Cut around the outside edge of the two globe pieces, including tabs A and B and circles C and D.
2. Paste tabs A and B to the back of the other piece at points a and b to create a ring.
3. Fold in the top points and paste them side-by-side on circle D like twelve slices of a pie. Do the same with the bottom points, pasting them to circle C.
